

Daniel KIKIMBA

Full Stack Developer & Cybersecurity Analyst

genesiskikimba@gmail.com +243 970 912 428
97, Av de l'Unité, Q. KYESHERO, Goma – Nord-Kivu, RD Congo

Profile

Primarily a Full-stack developer and system tester, I also actively practice reverse engineering for security analysis. My background in electronics and software development gives me a deep understanding of how applications are built, compiled, and communicate. Experienced in penetration testing and network traffic analysis, I am highly autonomous and perfectly comfortable working in strict, isolated environments.

Professional Experience and Internships

Digital Transformation et Technical Assistant Dec. 2023 to Present
Virunga Energies, Goma
- Designed and developed the complete CMMS (Computerized Maintenance Management System) application.
- Automated reporting processes and created interactive dashboards for performance tracking.
- Spearheaded complex data analysis and conducted rigorous technical tests for the Smart Grid Inhemeter project (IoT/Embedded systems environment).
- Provided direct operational and strategic support to the COO and COOA.
- Tech Stack : Laravel, PHP, VueJS

Full Stack Developer Dec. 2022 to Jun 2023
Naledi Services, Goma
- Developed custom mobile, desktop, and web applications for various B2B clients.
- Designed, modeled, and optimized databases for associated applications.
- Tech Stack: Flutter, Laravel API

Cybersecurity & System Administrator Nov. 2021 to Dec 2022
Subnet Congo, Goma

- Developed web, mobile, and desktop applications with secure database integration.
- Administered local/cloud servers and deployed software solutions.
- Performed deep-level hardware troubleshooting and maintenance on electronic equipment.
- Tech Stack: Laravel, Spring Boot, Flutter, C#, Mysql
- Conducted penetration testing and vulnerability assessments on developed systems and applications.

Monitoring and Evaluation Officer (Intern) Feb. 2021 to Apr. 2021
Institut National de Préparation Professionnelle, Goma
- Conducted post-training monitoring and evaluation for the 2021 cohort of learners.
- Collected and processed statistical data to support continuous program improvement.

Electronics Technician Dec. 2015 to Jan. 2016
Vodacom RDC, à Goma
Diagnosed and repaired complex electronic and telecommunication equipment, providing a strong foundation for embedded systems and hardware-level logic.

Languages

Languages: French (Fluent), English (Intermediate - Technical), Swahili (Native)

Educations

Applied Computer Science
Oct. 2018 to Nov 2023
Institut Supérieur des Techniques Appliquées Goma, Goma
Bachelor's Degree in Applied Computer Science.

Web, Networks and Telecommunications
Nov. 2022 to August. 2023
Subnet Congo, Goma
Frontend Development (HTML, CSS, JavaScript), backend Development (Node.js, VueJs, Laravel, Spring Boot) and Networks and Telecommunications

Statistics Jul. 2019 to Jul. 2021
Institut Supérieur des Statistiques et des Nouvelles Technologies, Goma
Undergraduate Degree in Statistics.

Electronics Sept. 2010 to Jun. 2017
Institut Technique Industriel de Goma, Goma
State Diploma in Electronics.

Personal Information

Date of Birth: 2 Juin 1999
Place of Birth: Goma
Gender: Male
Nationality: Congolese
Marital Status: Single
GitHub: https://github.com/glinux99

Technical Skills

- Databases: MySQL, PostgreSQL, SQL
- Data & Analytics: R, STATA, SPSS
- Network Analysis: Wireshark, TCP/IP, Protocol Dissection, Traffic capture analysis, Nmap, HTTrack…
- Cybersecurity: Penetration Testing, Vulnerability Research, YARA rules
- Languages: Assembly, C, C#, Python, HTML5, CSS3, JavaScript, PHP, Dart

Interest

- Video Games
- Robotics & IoT
- Vulnerability Research
